Wolters Kluwer and WebAssign®

Wolters Kluwer and WebAssign® have partnered to provide you with the best content and delivery system to address all of your homework and assessment needs. This partnership gives you the power to assign randomized homework questions from the text you've selected for your students.

WebAssign® is a fully customizable online instructional system that enables teachers to instantly assess student performance, increase student engagement and save time spent grading. It offers randomized, algorithmic online problems that match the textbook questions, ensuring each student receives a different version of the same question.

IMMEDIATE FEEDBACK on questions helps students master concepts and instant assessment saves instructors time spent grading.

ANALYTICS let instructors quickly and easily assess class performance and provide students with detailed concept mastery data.

THE POWERFUL GRADING ENGINE understands mathematical language to grade like an instructor instead of forcing answer statements to fit a specific framework.

CUSTOMIZABLE SETTINGS offer extreme flexibility ranging from course setup to secure testing features, so instructors can design their course to suit their pedagogical goals.

INTEGRATION with leading learning management systems as well as custom integration options support a smooth, seamless implementation.

SUPERIOR CUSTOMER SUPPORT is available for both instructors and students and includes extensive training services and resources.
